

Cases By Source Awarded Distributorship for Hardigg Cases

June 23, 2009, Mahwah, NJ-- [Cases By Source, Inc.](http://www.casesbysource.com), manufacturer of stock and custom case solutions (in plastic, metal, fabric and wood), has been awarded a distributorship for Hardigg Cases and Storm Cases.

Cases By Source will add Hardigg's product line of 500-plus case molds and custom solutions to its existing inventory of 4,000 stock SKU's and [custom case solutions](#). The Hardigg name is synonymous with high-end roto molded protective shipping and specialty cases and rack mount cases. The brand—which also produces the Storm Case line of injection molded protective cases— was founded in 1954 and maintains a position as an industry leader, providing virtually indestructible containers to the military, consumer market, public safety officials like police and fire departments and the industrial sector. In January 2009, Pelican Products—for whom Cases By Source is a Master Distributor of [cases](#) and [lighting systems](#)—purchased the company. A \$200 million price tag made it the largest acquisition ever in the case industry.

Cases By Source is honored to support Pelican's pledge to lead innovation in the industry. "Source has enjoyed many years of success with the Pelican organization. Now that Hardigg, a former Pelican rival, is part of the Pelican family, we look forward to expanding the market for Hardigg cases and bringing them into areas where Source has a market share," said Alan Adler, President of Cases By Source.

Of the 2200 Pelican dealers, Cases By Source is one of only 15 to earn a distributorship. Working with Pelican and Hardigg as a combined entity will give Source access to the world's largest selection of roto molded transport cases and injection molded cases. Adds Adler, "The technology developed by Hardigg's world-class engineering department is a perfect fit for Source's many high-tech customers and the new relationship will benefit all greatly."

About Cases By Source

[Cases By Source Inc.](http://www.casesbysource.com) designs and manufactures protective packaging, mostly in the form of reusable/re-shippable cases. The cases are used to secure, protect, transport, and showcase the finest (and most expensive) instruments and merchandise, from [precision medical devices](#) to sensitive equipment used by the [US military](#). The cases ensure clients' equipment will be protected through the distribution cycle and will arrive safely at its destination. Customers range from small companies to Fortune 500 corporations. Source has earned international recognition for their stock and [custom case solutions](#) and their dedication to customer service.
